

Dear Sir/Madam,

Thank you for taking the time to explore my portfolio and credentials.

I am a Computer Science major with an LL.B and diverse professional experience, currently transitioning into a career in software engineering. I am looking to join an ambitious, hardworking and professional team so we can grow together. Bilingual in Hebrew and English.

I have academic experience in object-oriented programming using JS, Python, C++ and other languages. I have built and contributed to web applications using frameworks like React and Node.js. I am also experienced in working with both relational (MySQL) and non-relational (MongoDB) databases.

I am a quick learner who is accustomed to a fast-paced work environment where deadlines are a priority and handling multiple jobs at once is the norm. I enjoy a challenge and I work hard to attain my goals. I have great communication skills and understand the importance of deadlines.

I will be graduating in May 2025, and I am enthusiastic about continuing my journey and securing a full-time software engineering position where I can apply my knowledge while continuously learning and growing. With solid analytical skills and strong work ethic, I am equipped with the necessary tools to contribute meaningfully to any team I join.

Since a resume cannot fully explain in detail all of my skills, abilities, and accomplishments, nor can it predict my potential within your organization, I would welcome a personal interview to further discuss the merging of my training and background with the needs and goals of your company.

I look forward to the opportunity to meet with you and members of your team.

Sincerely,

Alon Saar
